as were reduced to the condition I was in. In the intinced many people to believe my recovery only tempory. I now prepared and gave medicines to consumptires for some time, and made many wonderful
cures: and the demand increased so rapidly, that I determined to offer them to the public, and devote my
multivided attention to lung diseases. In truth, I
was next to forced to it, for people would send for
me, far and usar, to ascertain whether their cases
were like mine.

For many years, in conjunction with my principal
office in Philadelphis, I have been making regular
professional visits to New York, Boston, Baltimore

professional visits to New York, Boston, Daltimore and Pittsburgh.

For many years past, I have made as many as five hundred examinations weekly, with the "Respirometer." For such examinations my charge is three dollars, and it enables me to give each patient the true condition of his disease, and toll him frankly whether he will get well.

The great reason why physicians do not cure Consumption is, that they try todo too much; they give medicines to stop the cough, to stop the night aweats, heetife fever, and by so doing they derange she whole digestive system, locking up the secretions, and eventually the patient dise.

The Pulmonic Syrup is one of the most valuable medicines known. It is mutrient, powerfully tonic and heating in itself. It contains no option, yet it lossess the philegm in the hroughlal tubes, and antire throws it off with little exercitor; one bottle frequently cures an ordinary cubit, but it will be well first to pake a dose of Schench's Mandrake Pills to cleanse the stomach. The Pulmonic Syrup is readily digested and absorbed into the blood, to which it imparts its healing properties. It is one of the best preparations of fron in use; it is a powerful tonic of itself; and when the Seawed Tonic dissolves the mocus in the stomach, and is carried of by thesaid of the Mandrake Pills, a healing flow of gastric juice. dropsy sets in, and the parises does amoreny.

Bourbon Whiskey is recommended now-a-days by almost every physician. Many patients that visit my rooms, both main and female, are stupefied with this potson. The relief is temporary. If they cough, they take a little Whiskey: if they feel weak and feeshle, they take a little Whisky; and they go on in this way requiring more and more, until they are bloated up and imagine they are getting fleshy. The stemach, liver and digrestive powers are completely destroyed, and they loss their appetite for feed. No one was ever curred of committees by this process, where cavilies have been formed in the lungs. A little stimulant is frequently beneficial to consumptives, such as pure Brandy or good Wises—in many cases London Forter or Brown Stout, in moderate quantities, but Bourbon Whisky bastens on, instead of earling consumption.

New York, March 30, 1864. Mesers, Geo. C. Hubbel & Co .- Hudson, N. Y .- Gents: My family having been the recipients of marked benefit in health by the use of your Golden Bitters, I am induced to acknowledge my sense of gratitude in this letter. I can confidentially assert that since the first bottle of your bitters entered my house I have heard no comphaints of dyspepsia. My wife had been troubled with malady for years. The symtoms and the disease have both left, and she is well. Others of our family endorse the good qualities of your article, and I can only say in conclusion that I should be happy to give verbal evidence to the doubtappy and time they may call on me.
With much regard, I am, yours really, W. A. GRAHAM.
